

BIOGRAPHY

I am a skilled UI/UX Designer and Graphic Designer with experience planning and designing interfaces for consumer and internal use web applications. I have experience in the entire development process including, requirements gathering, site maps, flow diagrams, wireframes, UI design, graphic design, prototypes, development and interaction notes, user testing, and user guides. I have been an asset in my ability to plan and think critically about a project to discover business needs early on, saving time and money in the end.
